EDUCATION

Poornima College Of Engineering **Sep 2021 – Jul 2025**
Btech Computer Science (Artifical Intelligence) - ***CGPA - 9.2*** *Jaipur, Rajasthan*

WORK EXPERIENCE

Consultadd Inc. **Sept 2024 – Present**
Software Engineer *Pune, Maharashtra*

- Engineered **Django-based Applicant Tracking System(ATS) for Log1.com**, enabling seamless tracking of client submissions, interviews, and candidate profiles to streamline recruitment workflows for internal teams
- Designed and implemented **MySQL database schema** with **RESTful APIs** using **Django REST Framework**, optimized backend performance of Log1.com applying Django best practices and reducing manual record management by 40% for HR operations on Log1.com.
- Built **AI-powered LinkedIn content generation tool** using **Perplexity API** for topic research and **Gemini API for LLM-based content creation**, generating personalized posts from user topics and profiles.

Infonic Solutions **Jul 2024 – Sep 2024**
Full Stack Developer Intern *Jaipur, Rajasthan*

- Led development of scalable **CRM platform** using **Next.js** with **server-side rendering (SSR)**, boosting SEO, page load speed by 35%, and application performance for enterprise users.
- Optimized **Next.js data fetching via getServerSideProps, API routes, and dynamic routing, reducing latency by 40%** and enhancing responsiveness in high-traffic CRM environments.
- Engineered responsive **UI components leveraging React Hooks, Context API, and Tailwind CSS**, ensuring seamless cross-device experience and modular scalability for CRM workflows.

Scarpbag Pvt. Ltd. **Sep 2023 – Dec 2023**
Full Stack Developer Intern *Jaipur, Rajasthan*

- Spearheaded company web platform development as Developer using **React.js, Redux/Context API for state management, and responsive UI components**, improving user experience and performance by 30%.
- Led backend development with **Node.js, Express.js, MongoDB, PostgreSQL, and MySQL** integrations during internship, **designing scalable RESTful APIs** and secure authentication to support core applications.
- Developed **fleet management application** features including **real-time tracking, scheduling, and data synchronization, optimizing Node.js services for 99.9% uptime and high availability.**

PROJECTS

Events | Next.js| Tailwind CSS| Severless Actions| MongoDB

- Built a **full-stack events management web application** where users can register/login, create events, and RSVP to attend, improving overall user engagement.
- Implemented authenticated event creation with fields for name, date, time, location, and description, enabling structured event management and better discoverability.
- **Developed CRUD functionality for events (create, update, delete) with real-time UI updates, using serverless actions and MongoDB** to ensure responsive and reliable data handling.
